Delete Inspections or Enforcements at Certain Status

When synchronizing data from Accela Automation to CERS, the adapter enables CERS to delete the inspection records, enforcement records, and violation data if the statuses of these records (data) in Accela Automation are “Delete for CERS CME” (inspection or violation) or “b Delete” (enforcement).

Precondition:

1. The Accela Automation version is 7.2 FP2 Hotfix 28 or later.
2. The status of inspection in Accela Automation contains the “Delete for CERS CME” option.

Delete for CERS CME 5 DENIED

3 AM DEH Hazardous Materials

If end user updates the 'CERS CME Transaction' field to 'a Update' or 'b Delete', Status Date also should be updated manually to the new date to make sure the enforcement data can be synchronized from Accela Automation to CERS next time.

Remove Bad ASI Table Data from Facility Records

Fixed the issue that facility records contains bad data in the ASI table (Chemical and Waste). To remove the bad data, run the SQL script provided in the SQL command window.
