

CERS Adapter Release Notes Version 07/28/2014

- [Synchronizing Enforcement Violation Records](#)

Synchronizing Enforcement Violation Records

The CERS adapter synchronizes three more ASI table fields when synchronizing enforcement violation data from Accela Automation to CERS, as illustrated in the table below.

Violation ASI Table Field in Accela Automation	Title 27 Value in CERS	ASI Table Field Configuration in Accela Automation
Inspection Sequence ID	Based on the field value, the adapter generates the InspectionRegulatorKey and ViolationRegulatorKey in CERS.	Data Type = Text Length = 8 chars
RTC Qualifier	Violation Actual Return to Compliance Qualifier (935)	Data Type = Dropdown List Values: 1 Documented 2 Observed 3 Not Resolvable 4 Unobserved
Scheduled RTC Date	Violation Scheduled Return to Compliance Date (933)	Data Type = Date
