CERS Adapter Release Notes 06/20/2014

- [Send Inspection Date to CERS](#)
- [Add "No Violation" Status for Searching "Site Investigation" Inspections](#)
- [Skip Sending Data to CERS if the "Formal Enforcement Action (916)" Field Value Is "e Small Claims Court"](#)

Send Inspection Date to CERS

When synchronizing data from Accela Automation to CERS, the adapter correctly sends the value of the Inspection Date field to the Inspection Date field in CERS.

Add "No Violation" Status for Searching "Site Investigation" Inspections

The adapter supports the inspection status "No Violations" as a query criterion when searching inspections. The adapter now searches inspections by three statuses: "Complete", "Delete for CERS CME", and "No Violations".

The adapter synchronizes the "Site Investigation" inspection data in the same way as synchronizing the other inspection data (for example, "Routine" inspections).

Skip Sending Data to CERS if the "Formal Enforcement Action (916)" Field Value Is "e Small Claims Court"

Now the adapter for CME does not send any data to CERS if the value of the ASI field "Formal Enforcement Action (916)" is "e Small Claims Court". Refer to the table below for more information.

"Enforcement Action (914)" Field Value	"Formal Enforcement Action (916)" Field Value	Send Data by the Adapter for CME?
empty	a/b/c/d/e/empty	Before and after the enhancement: N
a/b/c…j	a/b/c/d	Before and after the enhancement: Y
a/b/c…j	e	**Before the enhancement: Y** **After the enhancement: N**
a/b/c…j	empty	Before and after the enhancement: Y
